

The KDS series is a robust and integrated panel system with fanless design specially developed for the use of rigorous environments. Featuring human machine interface, robust and versatile design, aimed at enhancing work efficiency and satisfying the demanding requirements of various industrial applications including hospitality, industrial automation, security, system control, processing, packaging, and electronics manufacturing.

The full system IP66 design is completely dust-tight and can be subjected to rain and even high pressure water jets to prevent the issues of danger and system crash.

- Full system IP66
- Win 10 IoT 64 bit
- VESA Mount Application
- Various applications

 Windows 10
